Audit of the Federal Bureau of Investigation’s Enterprise Application Service Program and Land Mobile Radio Network
Pursuant to the Federal Information Security Modernization Act of 2014 Fiscal Year 2019
Commentary and Summary

Objectives

The objectives of this audit were to determine whether the Federal Bureau of Investigation’s (FBI) Enterprise Application Service Program (EASP) and Land Mobile Radio Network (LMR-Net) security program and practices were consistent with the requirements of the Federal Information Security Modernization Act (FISMA). In addition, the audit was designed to perform a vulnerability assessment of the EASP and LMR-Net and evaluate selected system security controls.

Results in Brief

The audit did not identify any weakness in the control areas in FBI’s EASP or LMR-Net that resulted in a finding other than those deficiencies in five of the eight domain areas of FBI’s Information Security Program. These findings and subsequent recommendations are reported in the Audit of the FBI’s Information Security Program Pursuant to the FISMA of 2014, Fiscal Year 2019.

Recommendations

This audit provides no recommendations for improving FBI’s EASP or LMR-Net.

Public Release

The OIG is publicly releasing this Commentary and Summary of the report rather than the full report itself because Inspectors General are required by FISMA to take appropriate steps to ensure the protection of information that, if disclosed, may adversely affect information security. Such protections shall be commensurate with the risk.

Audit Approach

KPMG LLP conducted this performance audit of FBI’s EASP and LMR-Net under the direction of the Department of Justice Office of the Inspector General (OIG) and in accordance with Generally Accepted Government Auditing Standards (GAGAS) and the Office of Management and Budget (OMB) reporting requirements. The OIG reviewed KPMG LLP’s report and related documentation for compliance with GAGAS. The OIG’s review was not intended to enable the OIG to make a conclusion about the effectiveness of FBI’s information security controls. KPMG LLP is responsible for the attached auditors’ report dated October 17, 2019, and the conclusions expressed in the report. The OIG’s review disclosed no instances where KPMG did not comply, in all material respects, with GAGAS and OMB reporting requirements.

Background

FISMA was passed by Congress and signed into law by the President in 2014. FISMA assigns responsibilities to federal agencies, the National Institute of Standards and Technology (NIST), and OMB to strengthen federal information system security. This includes directing NIST to develop standards and guidelines for ensuring the effectiveness of information security controls over information systems that support federal agencies’ operations and assets, and requiring the head of each agency to implement policies and procedures to cost effectively reduce risks to an acceptable level.

Annually, agency Inspectors General are required to either perform an independent evaluation or contract an independent external auditor to perform an evaluation of the agency’s information security program and practices to ensure the effectiveness of the program and practices. Each evaluation must include: (1) testing the effectiveness of information security policies, procedures, and practices of a representative subset of the agency’s information systems; (2) an assessment (based on the results of the testing) of compliance with FISMA; and (3) separate representations, as appropriate, regarding information security related to national security systems.
The Department of Justice Office of the Inspector General (DOJ OIG) is a statutorily created independent entity whose mission is to detect and deter waste, fraud, abuse, and misconduct in the Department of Justice, and to promote economy and efficiency in the Department’s operations.

To report allegations of waste, fraud, abuse, or misconduct regarding DOJ programs, employees, contractors, grants, or contracts please visit or call the DOJ OIG Hotline at oig.justice.gov/hotline or (800) 869-4499.
